To BC Hydro:
re: hike in country folk rates + not Nelsonites:

- we have many more outages than Nelson
- we have to buy generators because of this to save our freezers. Often we are farmers so have freezer produce for winter.
- Rural + Nelson residencies should have equal rate hike
- we should be charged for our consumption alone - not charged more because we live outside of city limits
- we are not more prosperous than Nelsonites.

$1,000 for generator
- extra $ for ↑ gas for generator

Sincerely
