Comment:
I strenuously object to allowing BC Hydro to charge money for electric car charging. Those of us who are able have purchased electric cars at extremely high prices as a matter of principal. We are trying to do our part in dealing with the climate crisis. BC Hydro is crown corporation and does not need to charge for this service. We should all be doing what we can to get off the fossil fuels. Making people pay and pay every time they drive their electric car is just greedy.
