August 3, 2004

Mr. Robert J. Pellatt
Commission Secretary
British Columbia Utilities Commission
6th Floor, 900 Howe Street, Box 250
Vancouver, British Columbia
V6Z 2N3

Dear Mr. Pellatt:

**Re: Terasen Gas (Vancouver Island) Inc. (“TGVI”)
June 2004 Resource Plan Filing
Certificate of Public Convenience and Necessity Application
Request for Intervenor Status**

WestPac Terminals Inc. has announced plans to develop a LNG importation terminal and related facilities along the west coast of British Columbia.

One element of the proposed project will be the ability to provide long-term supplies of natural gas to Vancouver Island. Our project can offer alternatives to the proposed TGVI LNG production and storage facility and can provide natural gas supply alternatives to fuel proposed electric power generation facilities on Vancouver Island.

Because our project may be materially affected by actions proposed by TGVI or by decisions made by the Commission in the course of its review of the TGVI applications, WestPac Terminals Inc. formally requests that it be designated an “Intervenor” in the proposed hearings related to the TGVI June 2004 Resource Plan hearings and for the Terasen application for a Certificate of Public Convenience and Necessity relating to Terasen’s proposed LNG production and storage facility on Vancouver Island.

Please send all materials and announcements to my attention at the address above. I can be contacted by telephone at (403) 920-3277; by fax at (403) 266-5736 or by e-mail at waynestanley@westpacterminals.ca

Yours truly,

Wayne Stanley
Vice President
