DAY 5	ENTERED BY BCTC	DATE Feb 28/05

NE Purchasing with Alberta Exports Rule

The BC Hydro Wholesale Transmission Service Application - Supplement 30 states that "Network Integration Transmission Service allows the Network Customer to integrate, economically dispatch and regulate its current and planned Network Resources to serve its Network Load." In addition, the service "also may be used by the Network Customer to deliver economy energy purchases to its Network Load from non-designated resources on an as-available basis without additional charge" (which we have labelled as Network Economy Service). As such, it is our policy that when BC Hydro Power Supply reserves Network Economy Transmission Service and they or Powerex are exporting energy to Alberta, Power Supply and Powerex must schedule as much or more PTP transmission Service and energy from US to BC as they do BC to AB.
