I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

**My Specific Concern:**
BC Gas(Terasen) belongs to those whose backs it was built on! I am sorely disappointed in our government for allowing and or encouraging others to purchase anything that we as a country have discovered, created and maintained. This is unacceptable to me and many of my fellow Canadians that are experiencing this utter disrespect. How many dollars and cents can be made appears to be the only concern of our government. I must ask the government who will take care of our children? Most Canadians do not possess the financial resources to maintain a healthy lifestyle, how will our children achieve their full potential while struggling even harder than we do today? Canada and its resources belong to the Canadians who made it what it is today. Those Canadians are those of us who oppose this and any future attempted sales of our resources. I understand that managing a country's finances must be a challenging job, however, we have ask our government to represent Canadians' best interests, and this sale and other attempts to come directly revoke Canadians best interests while lining the pockets of those making the decisions! I want more for my daughter and her children...don't you?

I do not support the sale of Terasen Gas to none Canadian owners. The future of our country is dependant upon our natural resources, especially energy reserves. If we lose control of our natural resources we lose control of our future. It is short sighted to sell our natural resources for short term gain. We’ve already lost to much of Canada to foreign ownership, let us not continue down that disastrous road.

Are you sure this decision will prove to be financially advantageous in ten years, and do you want your name attached to this legacy?

Angel Richards

Dear Commission Secretary:

As secretary to the BC Utilities Commission I want to strongly urge you to reject the Terasen deal in Canada's national interest and the interests of BC citizens. The citizens of BC could well end up subsidizing the export of our own precious natural gas resource for American consumption. Using profits made from BC customers, Kinder Morgan will build gas pipelines to the U.S., dramatically increasing the percentage of natural gas we send south and contributing to higher gas prices here.

You must protect the interests of British Coumbians and not the interests of the corporate giants.

Sincerely,

Barbara Berger
1461 Sitka
Courtenay, BC
I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

**My Specific Concern:**
The sale of Terasen should be outlawed.

**My Specific Concern:**
We need to keep our resources and businesses Canadian OWNED AND OPERATED. Why would we want to even entertain something like this when the American Government continues to ignore Natfa rulings on our softwood lumber. If Kinder and Morgan want our natural gas WE can sell it to them at a premium and invest the profits in for our country. I come from a community where logging was once the backbone of our town. It provided thousands of jobs. The sawmills and logging companies were all owned and run by Canadian Companies. Now, they are all owned by American Companies. It just burns my butt to see the logs being barged down the inlet now to be milled in the States while they close the sawmills that use to do that milling here. Now those jobs have gone south to the States. What's up with that? What about the profits? They will go to the American Investors where they will invest in their own country until they have raped our resources and then turn their backs when it's gone. I AM TIRED OF THE AMERICAN GOVERNMENT BEING THE BIG BULLIES BUSH HAS MADE THEM BECOME. NO MORE SALES OF BRICKS AND MORTOR BIG CANADIAN CORPORATION TO THE AMERICANS.

**My Specific Concern:**
I am appaled with the Liberal government's agenda to sell B.C.-owned utilities. The fact that the sale is to an American company makes it all the more a sordid affair. The Liberals are flying their true "pirate" colours.

Commissioners:
I request that you act in Canadian interests and say NO to the sale of Terasen to Kinder-Morgan. This is a bad deal all round for Canadians, please don't sell us out.

I also demand you hold a public hearing to hear Canadian's concerns before you decide whether a US corporation will own our gas and our pipelines. This is crucial to our democracy.

Stand up for Canada and Canadians - show some backbone!

Thank you,

Respectfully,

* Sent from the [Terasen Gas Petition](http://eQuesnel.com) on eQuesnel.com.
As a citizen of Canada and a concerned resident of British Columbia, I am opposed to the sale of Terasen Inc. to Kinder Morgan.

It is not in the best interest of the people of BC to allow the sale to proceed.

I respectfully request that you do not permit the transaction to take place.

Respectfully

Edwin Jerke and Shirley Jerke
Kinder Morgan Inc. Purchase of Terasen Gas. This purchase should not be allowed for the following reasons.

1. Kinder Morgan is an American Conglomerate.

2. Terasen Gas purchases its gas from CEG ENERGY OPTIONS INC., which is owned by SEMINOLE CANADA GAS COMPANY, which is a wholly owned subsidiary of SemGroup, L.P. of Tulsa Oklahoma, another U.S. Conglomerate.

3. Terasen Gas was granted a 6% increase in July 2005 and a further 13% increase in October of 2005 by the B.C. Utilities Commission.

4. Terasen states that they make their profits on the transmission (Delivery) of the gas, not on the sale of the gas. They purchase the gas on the open market and sell it to their customers at cost. How much effort does Terasen put into the purchase of natural gas to ensure they get the best price for B.C. Customers? It seems to me if the cost of the gas is passed through to customers and the increases in the cost of the gas is approved by the B.C. Utilities Commission, that they are probably not too concerned about the actual cost of the gas.

5. If the cost of natural gas in B.C. continues to rise, people in large numbers will return to wood burning. The city of Prince George, B.C. presently pays $750,000.00 per year to heat its public buildings. This amount will increase to $850,000.00 in 2006 as a result of the latest increase. The city is looking at burning wood waste from local sawmills to generate heated water to heat buildings in the downtown area, in order to reduce their heating costs. This project will cost approximately $25,000,000.00. In addition regular citizens in the B.C. Interior will go back to wood burning which will have a negative effect on the environment over time.
6. Terasen Gas has approved a contract to purchase natural gas from CEG Energy Options Inc for 5 years at $8.69 per gigagoule. That’s the same rate the B.C. Utilities Commission approved for Terasen Gas. The contract was approved the same day the B.C. Utilities Commission approved Terasen’s application for an increase. How much time did Terasen spend to get customers the best price in the market? If the price of natural gas goes down, will residents of B.C. continue to pay the higher rate because Terasen has signed a 5 year contract??.

7. Some points to ponder

(a) Is there any connection between SemGroup, L.P. of Tulsa Oklahoma, and Kinder Morgan. Where does SemGroup, L.P. buy its natural gas, are we buying Canadian natural gas or are we buying American natural gas. Seminole Canada Gas Company has an order from the United States of America Department of Energy, Office of Fossil Energy., Docket NO. 04-34-NG . This order grants blanket authorization to Import and Export Natural Gas from and to Canada. DOE/FE Order NO. 1956 March 23, 2004. This order allows Seminole Canada Gas Co. blanket authorization to import up to 150 billion cubic feet (Bcf) of natural gas from Canada, and to export up to 150 Bct of natural gas to Canada, for a two year term.

(b) Do we really want our natural gas bought by and delivered to us by American Companies. Are we to be dependent on these Companies when the gas is in our back yard??

(c) Will these Companies have any concern or regard for the cost of gas to people who live in the Northern parts of British Columbia, where the weather in the winter time can go to –40 degrees C.

(d) Can low income earners, and Seniors on limited income afford to pay these higher prices.

(e) The B.C. Utilities Commission should think long and hard about this sale, and keep the interests of all Canadians, and
British Columbians in particular uppermost in their minds when dealing with this issue.

Is very difficult for individuals to make a comprehensive analysis of the inner workings of major Corporations, if not impossible. That is the reason we have a B.C. Utilities Commission. Its up to you to protect our interests. Please do so.

Yours truly

Commission Secretary,
B.C. Utilities Commission,
Sixth Floor, 900 Howe Street,
Vancouver, B.C.
V6Z 2N3

Dear Sir:

I oppose the sale of Terasen to American based Kinder Morgan. British Columbia has a good supply of natural gas and the American attitude is to horde oil and gas to supply North American needs in perpetuity. This is not the best option for B.C. We must keep options open to trade offshore to China and India.

The softwood lumber hassle should be remembered. The Americans change the rules to their liking and/or do not abide by the rules of the game. U.S.A. is not abiding by the NAFTA agreement.

Kinder Morgan is subject to American laws which can override Canadian law. When opportunities outside of North America are available, Kinder Morgan may have to abide to American constraints and thereby affect investment opportunities. Not in the best interest of B.C.

We have enough natural resources tied in with American interests. We should diversify and have other countries involved with our natural resources. With offshore investments we are more apt to make decisions for the improvement in B.C., no political interference from the U.S.A. We should have a more global approach with our natural resources rather than a North American approach, which is a detriment to B.C.’s economy.

The oil sands in Alberta is another example that should have a global approach.

Other concerns:
(1) Local price of natural gas. Texas is a long way south and they don’t understand how reliant we are on heating requirements in the winter. Gas is a good example, if there is an increase in the American price of gas, it will increase the Canadian price, even though we have a good supply of natural gas.
(2) Control, in essence, is given to our American neighbour. I think control of our natural resources should remain in B.C. and Canada.

Thank you for the opportunity of presenting our views on this pending takeover.

Yours truly,

George Malfair (retired Forester)

Attn:  Commission Secretary:
I am very much against the sale of Terasen Inc. to Kinder/Morgan Inc. They are already contemplating a huge increase in rates.
I am a Senior citizen on a fixed income, trying to stay in my our home, which I have been in for 30 plus years, in the Cariboo, It is very upsetting to say the least, that a thing like winter heating of our homes will be such a burden, when it flows right past our doors going to the U.S.A. to make them multi-millionaires, while we worry how to stay warm. Please reconsider the sale, and think of the B.C. citizens!!!!

Hazel Parker, Lac La Hache, B.C.
I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

When we finally run out actually in the near future, do you really think the Americans will sell us their non-renewable resources so that we will not freeze in the dark?!

Hugh & Claire Jenney   R. R. 1, Stella, ON   K0H 2S0   613-384-7830

Subject: eNorthernBC: A postcard from a concerned BC citizen re: Sale of Terasen Gas

I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

**My Specific Concern:**
Gas passing through Canadian pipelines through Canadian soil should be controlled by Canadians. I'm very concerned about their maintenance in regards to the safety of the population and the protection of the environment.

**My Specific Concern:**
We are not a state of the usa and we should and need to, decide where our resources are spent and at what cost, the big bullys over the border should not be given the opportunity to thumb their noses at us as they are doing with the lumber issue, instead we should be making them pay through the nose for our gas and power until we have a level playing field and their friends and lackeys in the BC government should be doing this instead of letting them get away with their high handed actions.

**My Specific Concern:**
I am against the sale and/or removal of control of British Columbia's resources to people or corporations outside of the province, firstly, and definitely not outside of the country of Canada. This is a matter of the security and sovereignty concerning our natural resources. Ownership is vital to the survival of our say in the distribution of the resources shared by the people of this province.
Just say NO!

I do not support the sale of Terasen Gas to none Canadian owners. The future of our country is dependant upon our natural resources, especially energy reserves. If we lose control of our natural resources we lose control of our future. It is short sighted to sell our natural resources for short term gain.

Are you sure this decision will prove to be financially advantageous in ten years, and do you want your name attached to this legacy?

Judy Becker
Cranbrook BC
Dear Sirs,

I am not a person that writes letters of protest, but this pending sale of our natural resource to an American company has made me feel very nervous and somewhat irate.

We, as Canadians must protect our rights, I feel there is nothing wrong with selling our natural resources to the Americans but to let them have the authority, ability and control to do what is in their best interests is something that we should not let them do.

I implore you to take into consideration my protest in this matter. Please do not let this betrayal of British Columbians and all Canadians happen.

Yours truly,

(Mrs.) Karen E. Rice

I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

**My Specific Concern:**
I oppose the sale of Terasen to KMI, and the process by which it has been orchestrated, for these reasons:

a) Lack of full disclosure by the Campbell government in lifting the restrictions governing Terasen, and its true motives for doing so;

b) Lack of mandate by the Campbell government to monetize public utility assets for ultimate sale to US private interests by first privatizing such assets to a Canadian corporate vehicle. If ever there was an issue requiring referendum this qualifies - to do otherwise is a breach of the public trust;

c) The takeover is essentially a pre-emptive strike by the Americans to prevent Canadians from further diversifying our export markets via shipment of Alberta tar sands oil to Asian (i.e. Chinese) markets, as Enbridge is planning to do. It is highly improbable that KMI, run by an individual with intimate ties to the White House, will execute Terasen's plans to build a competing spur line to ship Alberta tar sands oil to Prince Rupert &/or Kitimat. Instead KMI will expand capacity south to the USA, making Canada even more beholden to US industrial and consumer interests;

d) There is no precedent in Canada for US interests owning virtually all of a province's gas infrastructure (first Westcoast, now Terasen). As a country, if we don't own and control a material interest in our energy delivery systems then we will defer to the interests that do. Manifest Destiny is alive and well.

e) Ultimately, the BCUC hearings are a joke. The BCUC wants to avoid oral hearings in favour of written submissions, but the true fundamental deficiency in this process is that the BCUC has no mandate to stop the Terasen sale, or any other future sale of any other utility for that matter. The BCUC hearings are for "optics" purposes only and are intended to humour the BC public. It is disingenuous for the Campbell government, the regulators it appoints, the Liberal’s media fans, and the companies that contribute money to the BC Liberal party, to claim otherwise.

Dear Commission Secretary,

I would like to voice my opposition to the sale of the Terasen to Kinder Morgan. I don't think this represents BC's best interests. With a resource as important as Gas and energy, this resource's ownership and use should be based within the BC community it serves, not in some board room in the United States.

Thank you for your time, and please let me know how else I can voice my beliefs.

Cheers,

Kevin Bao

Dear Sirs:

I am a resident of Nanaimo, British Columbia, and my home is heated by natural gas supplied by Terasen. I would like to say that I am NOT in favour of the purchase of Terasen (formerly BC Gas) by the U.S. company Kinder Morgan for the following reasons:

1. I am concerned that natural gas prices will go up because of this transaction. I understand that this is already happening on the Mainland and will be happening next year on Vancouver Island.

2. I do not want an American company to have more control over our oil and gas supplies, which this transaction will give them. My understanding is that, under NAFTA, no matter what happens to Canada's supply of natural gas, we must continue to ship a set quantity south to the U.S. even if this means a shortage to Canadians.

In summary, I believe that approval of this transaction will result in a significant disadvantage to Canadian consumers of Terasen's products, both in higher prices and lower supply.

Sincerely,

Lesley Lee

My Specific Concern:
Terasen (originally known as BC Gas) was created as a legacy for the generations of British Columbians. As a resource, natural gas was intended to be used for the benefit of British Columbians with control in the public domain. Allowing control of this priceless resource to transfer out of the country puts control and profits into foreign hands and has the potential to leave British Columbians at the mercy of a foreign power. STOP the sale of Terasen Gas NOW!

**My Specific Concern:**
we can not lose control of this very important energy sector. The Campbell government will be gone with the $ and the people will be left holding the empty bag and the resource will be in control of the USA

To Whom It May Concern:

I am writing to express our concerns about giving control of our energy resources to another country. My husband and I strongly believe that Terasen should stay BC owned.

Thank you

Hi

I would just like to say, that I am strongly apposed to the sale of Terasen to Kinder Morgan.

Thank you
I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

**My Specific Concern:**
Judging by the information provided to me, Kinder Morgan is a company that has a bad track record. I totally oppose the sale of Terasan Gas to this US company!!!!!!!!!!!!!!

Smith, Constance BCUC:EX

From: Robin Thomas [robinsbooks@shaw.ca]  
Sent: Sunday, October 02, 2005 2:23 PM  
To: Commission Secretary BCUC:EX  
Subject: I protest the sale of Terasen Gas to an American Corporation

Commission Secretary  
BC Utilities Commission  
Sixth Floor, 900 Howe Street  
Vancouver, B.C. V6Z 2N3

I do not support the sale of Terasen Gas to none Canadian owners. The future of our country is dependant upon our natural resources, especially energy reserves. If we lose control of our natural resources we lose control of our future. It is short sighted to sell our natural resources for short term gain.

Are you sure this decision will prove to be financially advantageous in ten years, and do you want your name attached to this legacy?

Dear Editor,

I demand that the sale of Terasen Gas to U.S. Kinder Morgan NOT be approved by the B.C. Utilities Commission (BCUC). The reasons are as follows:

Firstly, the provincial government (through the BC Utilities Commission) should halt the sale of Terasen Gas to the U.S. Kinder Morgan as a message to the U.S. on softwood lumber. We get two for one - a whack at the US on the only issue that matters to them (assured energy supply = national security) AND an attack on NAFTA at the same time. Both Tory senator Pat Carney and NDP leader Carol James have called on the government to do this. B.C. Forestry Minister Rich Coleman didn't rule out the possibility. I encourage him to take a stand.

Secondly, remember that when we signed NAFTA we signed away our energy security. We now sell 58% of our natural gas to the U.S. and WE MUST SELL no less than this percentage even when our gas reserves start falling and we face a shortage. The more pipelines built to the U.S. by Kinder Morgan, the faster we sell our energy security and the bigger the percentage we have to sell in the future.

Kinder Morgan has a bad reputation for lax environmental and safety standards. According to an article in Tyee News (on-line), Carl Weimer, executive director of the Bellingham, Washington--based Pipeline Safety Trust stated that “Kinder Morgan has a poor safety record, which he attributes to the company taking over a huge network of pipelines in a short time frame. They've expanded rapidly and a lot of the pipelines they took over are older pipelines. And that has undercut some of the safety,” he says.
“In one deadly incident five people were killed last November in Walnut Creek, California, after an excavator ruptured a high-pressure petroleum line.” Kinder Morgan was charged with “serious willful” negligence. According to Terasen, many of their B.C. pipelines are approaching 50 years of age, and some, particularly under Vancouver, are as old as 70 years. KM is committed to getting gas to the US - will it cut corners here in Canada and compromise safety?

Another blemish on Kinder Morgan’s environmental record is a 2004 70,000-gallon diesel spill into a Northern California marsh from an old, corroded pipeline."

Fourthly, profits from the company will now flow to Texas (where the company is based), instead of staying in Canada.

Fifthly, we are increasing our gas sales to a country that refuses to commit to conservation, refuses to sign the Kyoto accord, denies there is any such thing as global warming and believes it has a right to burn as much oil and gas as it can its hands on. Part of Canada’s commitment to fight global warming should be to make it more difficult - not easier- for the U.S. to pollute.

Yours sincerely,

Sarin Moddle

I do not believe the purchase or Terasen by Kinder Morgan should be allowed to go through. Terasen has lied to us about it's reason for changing it's name. They said in advertisements they wished to distance themselves from BC Hydro to because mostly of the bad rap BC Hydro was getting at the time for raising it's rates. In fact it was now found out that there was a loop hole. If they changed their name it would no longer bind them to provincial legislation to remain a BC resource. I believe that if you let them go against the existing provincial legislation that it would be wrong. The intent is there. What if I was a murderer and I changed my name would that take the courts action against me away. I don't think so. No company should be exempt from legislation just because they change their name. I believe you would be setting a bad president if you allow this sale to go through.

Terasen knew it was wrong otherwise why would they have chosen to try to deceive the residents of BC until it was too late.

Stephen W. Love
Dear sir;

I wish to submit my concerns with respect to selling Terasen to Kinder Morgan.

Firstly, before we sell the Americans anything we should ensure that we receive our monies for the soft wood lumber dispute. To sell Terasen is certainly not respecting the wishes of B.C citizens.

Why would we want to sell any utility and lose total control of our utilities? I do not want to see Terasen sold to Kinder Morgan now or in the future. B.C. must keep what resources they have and look after the B.C. folk and not the Americans.

Look at the mess our Medical Plan is in due to an American company managing our health plans. They are six months behind in giving out applications and once they receive the application they are another three months getting a medical card to residents. Dispicable. Now we are contemplating selling our utility to an American company? What would ever possess us to do such a thing. Look at the lumber dispute and that is still a mess. Why??

No, My husband and I do not want to see Terasen sold to Kinder Morgan.

Thank you for allowing the B.C. citizens address the issue.

Sincerely,

Tom and Marie Dick
I am writing to protest the sale of Terasen Gas to the US company Kinder Morgan. The sale must be approved by the BC Utilities Commission which will hold hearings on the sale and so it is still possible to stop.

My Specific Concern:
I am very concerned about the sale of Terasen Gas to Kinder Morgan. Kinder Morgan is a multinational corporation with a very poor record of environmental stewardship. Furthermore, B.C. Gas was established because our energy resources were deemed too important to have in the hands of corporate &/or foreign ownership. With the knowledge of Enron how can we contemplate such a sale.
