**Subject:** RE: FortisBC AMI CPCN, Project No. 3698682 - Comments of Jerry Flynn sent under Subject 'CEC Clarification Comments on Community Input Sessions'

Commission Secretary & Listed Interveners

Please be advised that Mr. Flynn, if he did indeed send the email below, does not have the permission of the CEC nor authority from the CEC to send emails purporting to be clarifications of CEC views.

Mr. Flynn's comments in the email below, if in fact these are Mr. Flynn's views, are not the views of the CEC.

Assuming this communication did come from Mr. Flynn it would appear that he has hit 'reply all' and failed to change the subject line.

The CEC would like to clarify that it is not associated with Mr. Flynn nor the views expressed in the email below and that CEC legal counsel Owen Bird is in no way associated with Mr. Flynn.

Sincerely,

David Craig

Mr. David Craig  
Executive Director  
Commercial Energy Consumers (CEC) Association of BC  
Suite 509 – 1190 Melville Street  
Vancouver, B.C., V6E 3W1

Phone: 604-568-4904

Cell: 604-351-2332

**Subject:** RE: FortisBC AMI CPCN, Project No. 3698682 - CEC Clarification Comments on Community Input Sessions

I am new to this whole Intervener role and am unfamiliar and not particularly comfortable with the cumbersome administrative process. One thing I do know is that this whole smart meter, meshed-grid and electromagnetic radiation (EMR) subject is of such great - even historical - importance to us all, that the public MUST be given every opportunity to see, hear and understand exactly what is going on.

I personally have a long military background much of it spent in SIGINT (signals intelligence) and EW (electronic warfare), including two years in Canada's National Defense Headquarters, where I served as an Electronics Warfare Officer in the Directorate of Electronic Warfare for two years. I have an entirely different and a very real appreciation for the undeniable dangers that accrue from any pulsed wireless EMR-emitting technology, including those which electric utilities and the telecom industry continue to impose on our uninformed, unsuspecting and unprotected society.

Certainly, within the military intelligence community, at least, it has long been known that both the former U.S.S.R. and the U.S. militaries have experimented for more than 60 years - and continue to do so - with the non-thermal low-intensity, long term effects of pulsed microwave EMR on humans! It is further known that both Russia and the U.S. have developed an arsenal of microwave weapons capable of disabling, maiming and even killing humans ... plus they have pulsed microwave weapons capable of mind control. Of the specific frequencies the Soviet's in particular experimented with and whose lethality they now fully understand one stands out: 2.4 GHz! *as this is the very same* frequency used in today's wi-fi routers, DECT phones and the ZigBee radios inside every Smart Meter. Significantly, too, the Soviets' effective radiated power (ERP) was estimated to be lower than that currently permitted by both Health Canada's or the FCC's "Guidelines"!

History has been written; the de-classified government documents are there to be seen; the Internet is full of evidence, which is unassailable. No informed person can question that microwave weapons exist or that the long term, low intensity EMR emitted by pulsed microwave devices are injurious to not just humans but to all life forms. So, let's make absolutely certain these hearing are open to the public - and, just as importantly - to the media.

Jerry Flynn

Retired Captain, Canadian Armed Forces (ex-Royal Canadian Navy)
