Attention Erica Hamilton, Commission Secretary

RE: FortisBC Inc Advance Metering Infrastructure CPCN

Subject: Motion to Reopen the Evidentiary Record, Reply Submission

Area D writes to support the position taken by the B.C. Sustainable Energy Association and Sierra Club British Columbia in reply to Fortis BC. If the International Agency for Research on Cancer ("Report") issued April 19, 2013 adds new evidence not previously considered by the Commission then it should be added to the evidentiary record and interveners should be given an opportunity to make comment.

Respectfully submitted
Andy Shadrack
Director Area D
