Dear Sirs and Mesdames:

Re: BC Hydro 2015 Rate Design Application (“Application”)

By this letter the Clean Energy Association of B.C. (“CEBC”) wishes to become a registered intervenor in the above proceedings.

The CEBC represents power producers that sell and/or wish to sell electricity to B.C. Hydro. It also represents suppliers and consultants that provide goods and services to these producers. It holds an annual general meeting, hosts an annual conference and its board meets regularly.

Although the CEBC is in the early stages of its review of the Application, generally the nature of the issues it intends to pursue includes but isn’t limited to the freshet rate pilot rate and the long run marginal cost of electrical energy.

The CEBC will be actively involved in the review process established by the British Columbia Utilities Commission.

The contact person for the CEBC with respect to the proceedings is David Austin at:
