Subject: Registration and Requests as Intervener BC Hydro 2015 Rate Design Application

I am registering as an Intervener for the BC Hydro 2015 Rate Design Application. I have also registered on line.

Like all residential customers in British Columbia I am a stakeholder in these proceedings. I have also been involved with a group, Friends for Safe Technology. My complaints concern BC Hydro's Legacy Meter charge, but other concerns may arise reviewing the application.

I am requesting a written copy of BC Hydro's 2015 Rate Design Application.

I am requesting an extension to review this lengthy application and write my submission. Since I was not informed about this rate application or given any opportunity for feedback, it's important that I have this chance to review it.

Do you require any other information before I make my submission?

Thanks Jayne Priest
