**Subject:** intervener application

Dear Erica,

As a BC Hydro customer and a legacy meter fee payer I have an interest in the review of the rate structure and the application submitted by Hydro.

I have concerns about the timeline for this application and lack of due diligence by BC Hydro to inform its customers about this application. I think an extension is in order so as to allow all concerned to read and understand the long & complicated application!!! I'd ask for a paper copy but I think the commission's time could be better spent delving into BC Hydro's business practices on behalf of the citizens of B.C.

Thanks for your time. I'll look forward to hearing what I have to do next as an intervener.
