Subject: BC Hydro Rate Application

I wish to register as an Interested Party for the BC Hydro Rate Design Application.

My interests are as follows:

1. I am currently installing a solar system with a net metering connection and I have an interest in the residential rates and the rate paid to owners of solar systems if a surplus of power is generated;
2. I have an interest in the capital and operating costs of BC Hydro's generation and transmission plans;
3. I have an interest in the bulk industrial power rates and the impact these rates have on resource development in this Province.

Regards,

Don Barz
