

## Request to Intervene

In accordance with the Commission's Rules of Practice and Procedure, a Request to Intervene form must be received by the Commission by the deadline included in the proceeding's regulatory timetable. Please provide a completed form to the Commission Secretary at [commission.secretary@bcuc.com](mailto:commission.secretary@bcuc.com). If email is unavailable, forms may be mailed to the Commission Secretary at the address above.

### Additional information

Please state your reasons for intervening in this proceeding.

I am concerned about the lack of accountability that BC Hydro has to it's rate payers and it's share holders. Some of these items, if approved, will negatively impact the lives of the citizens of BC who are not even aware that this process is underway! The BCUC must hear representation from all before decisions are made.

Please state how you are directly or sufficiently affected by the Commission's decision in this matter; or describe your experience, information, or expertise relevant to this matter that would contribute to the Commission's decision making.

I would like to be part of a group that is represented by a lawyer as I do not have the expertise to present my concerns in such a way as to do them justice. I and all BC residents have been adversely affected by business decisions made by BC Hydro. The costs for low income families, for what in essence is an essential service, are untenable.

Please list the key issues you intend to address in the proceeding.

I would like to have concerns heard with regards the \$700.00 re-connection fee for meters and the amended Electric Tariff that Hydro has presented.

For administrative purposes only

Do you intend to participate fully, including attendance at hearings and submission of evidence or information requests, if applicable?

No

Do you intend to request PACA funding? This does not impact your ability to participate.

Yes

Have you or your organization web-registered as an intervener or interested party in the past 12 months?

No
