

FortisBC Net Metering Update Application
Intervenor Information Request by Donald Scarlett

1. What percentage of FBC's average annual electricity requirements is purchased from sources not owned by FBC?
2. Please list the suppliers of electricity, other than Net Metering (NM) customers, from whom FBC has purchased energy since 2009. If purchases have been made on the "spot market" please identify the point of purchase.
3. Please provide the complete range of prices FBC has paid for electricity from sources other than NM customers since 2009.
4. Does FBC participate in any program allowing its electricity customers to purchase "green" power (e.g. Bullfrog Power) at a premium?
5. If so, please describe the program and provide the cost customer would pay for the "green" power.
6. How much electricity (GWh) did FBC sell in the most recent year of record?
7. What percentage of FBC's annual electricity sales were transmission line losses during that year?
8. What was FBC's annual expenditure for electricity demand-side management (Power Smart) programs including advertising & promotion, rebates, subsidies and free energy saving supplies in the most recent year of record?
9. How much electrical energy is estimated to have been saved by FBC's Power Smart programs in the most recent year of record?
10. What is the value of lost sales to FBC resulting from FBC's Power Smart programs in the most recent year of record?
11. Have NM customers since 2009 created voltage or frequency stability problems, safety issues, damaged FBC equipment or infrastructure or caused any other harm to FBC?
