July 15, 2016

British Columbia Utilities Commission  
Sixth Floor, 900 Howe Street, Box 250  
Vancouver, BC, V6Z 2N3  
Attn: Laurel Ross, Acting Commission Secretary  
By Web Posting

Dear Madam:

Re: BC Hydro 2015 Rate Design Application (RDA);  
Commission letter of June 30, 2016 [Exhibit A-33];  
Commercial Energy Consumers (CEC) proposal for a non-firm interruptible rate pilot for  
medium and large general service customers [Exhibit C1-10];  
Request for submission on process by July 18, 2016 [Exhibit A-35];  
BC Sustainable Energy Association and Sierra Club BC submissions

---

In response to the Commission's July 11, 2016 letter, these are BCSEA-SCBC's submissions.

CEC filed evidence and responded to information requests on its evidence. In BCSEA-SCBC's view the appropriate next procedural step is that CEC's witnesses would be available for cross-examination during the oral hearing scheduled for August. Written argument would follow in accordance with the existing regulatory timetable.

BCSEA-SCBC's position echoes that of AMPC in the first bulleted paragraph starting at the bottom of page 1 of AMPC's July 7, 2016 submission [Exhibit C12-12].

All the above is respectfully submitted.

Yours truly,

William J. Andrews
