c/o Christopher Weafer

Regarding the CEC submission DOC_51110_C24-2 CEC Written Evidence would the CEC kindly respond to the following:

1. What are the underlying source(s) of the values in the data tables in Section 8.19 for the Slow/Base/High Scenarios ?
2. What assumptions are in the data/graph with respect to any increase in the BC light duty fleet per year due to population growth in BC ?
