Comment:

To keep down on rock chip damage: 1) I would like to see discounts for drivers that use mud flaps that are no higher than 5cm from the road when the vehicle is in park. 2) I would also like to have ICBC work with city road crews to use actual sand on roads and highways and not what appears to be 3/4 inch crushed rock that causes so much damage to our wind shields. Both of those options would greatly help to reduce costs related to windshield repairs and replacements not to mention body damage caused by flying rocks as well.
