## BRITISH COLUMBIA UTILITIES COMMISSION

British Columbia Hydro and Power Authority F2020 to F2021 Revenue Requirements Application

Project No. 1598990

AMPC Outline

**Items 1 and 2: Applying *Greenhouse Gas Reduction (Clean Energy) Regulation* and *Transmission Upgrade Exemption Regulation* to the PRES and MIN to LNG Canada projects, respectively.**

- No comments.

**Item 3: Intention to file intervener evidence and if so, relating to what specific matters.**

- Preliminarily:
  - Industrial rate competitiveness and optional rates.
  - Expert evidence: comparing practices with other provinces, regulatory account analysis, forecast costs, including cost of energy, finance charges, and certain operating costs and capital projects.

**Item 4: Written or oral public hearing, or some other process.**

- Oral public hearing in the normal course.

**Item 5: Steps and timetable associated with the recommended regulatory review process.**

- Further steps: evidentiary updates, second round of IRs, second procedural conference, intervener evidence and IRs, oral hearing.
- Second procedural hearing may scope oral hearing by screening out matters where a witness panel is not required, in the normal course. Identifying eligible areas *now* is premature.
- Intervener evidence must be able to respond to oral hearing scope.
- Cost of Energy Update should precede intervener evidence.
- Cost of Energy Update should be provided to interveners signing undertakings.
- Ending evidence by December 2019 does not justify limiting intervener hearing participation / procedural fairness.

**Item 6: Other Matters.**

- None.
