The result is that a 10kW system will not exceed the consumption of an average household and thus should be exempt for the application screening process. This would negate the need to review over 80% of the applications, thus increasing efficiency, accessibility, and creating a streamlined and transparent process for participation.

Table 3 Net Metering Program Custon Generating Facility Size (Marc

Nameplate Capacity	Number of Customers
≤ 5 kW	955
> 5 kW, ≤ 10 kW	657
> 10 kW, ≤ 25 kW	189
> 25 kW, ≤ 50 kW	34

1.1. Please provide CanSIA's reasoning for why 'average' household consumption should be the appropriate threshold, as opposed to another metric, such as being under a particular percentile level.
