BC HYDRO UNDERTAKING

BC HYDRO REVENUE REQUIREMENT HEARING 2004/05 AND 2005/06

HEARING DATE

June 8, 2004

TRANSCRIPT REFERENCE

Volume 19, Page 3301

REQUESTOR: IPPBC

QUESTION

Provide historical data of system inflows as a percentage of average inflows for the period of record from 1942 to 1946.

RESPONSE

The system inflows during the historic critical period as a percentage of the average inflows in the 1971-2000 reference period is provided in the table below:

Year	Actual Inflow as a % of Average Inflow
1942-1943	85.9%
1943-1944	78.1%
1944-1945	81.9%

Note that some of the inflow data used to develop these estimates is based on correlated data, not measured stream flow information.
