Phone number:

Also representing (if applicable):

Additional information

Please state your reasons for intervening in this proceeding:

SSL is currently involved in a public hearing process for its Stream A application and will end up being subject to the Guidelines, whether found to be a Stream A or Stream B TES.

Please state how you are directly or sufficiently affected by the Commission's decision in this matter; or describe your experience, information, or expertise relevant to this matter that would contribute to the Commission's decision making:

SSL has been involved in two public hearing processes now - one to determine whether it is a public utility, and one (ongoing) for its Stream A application. As the operator of one of the few thermal energy systems in the Province, SSL is uniquely situated to provide input on these systems and the guidelines as they currently exist and as they may be revised.

Please list the key issues you intend to address in the proceeding:

SSL would intend to address stream classification criteria, levels of regulation, exemptions, and other issues that arise during the proceeding.

For administrative purposes only

Do you intend to participate fully, including attendance at hearings and submission of evidence or information requests, if applicable?: Yes

Do you intend to request PACA funding? This does not impact your ability to participate: No

Have you or your organization web-registered as an intervener or interested party in the past 12 months?: Yes

If yes, please provide your username: [REDACTED]
