Subject: British Columbia Utilities Commission Review of Thermal Energy Systems Regulatory Framework Guidelines ~
Project No. 1599043
Date: Friday, February 14, 2020 3:25:27 PM

Dear Commission Secretary,

Interested Party Documents

My comments on the draft Terms of Reference, per Order G-341-19.1 are that the proposed scope and content of the review is appropriate.

However, I would like to request the inclusion of Thermal Energy Systems GHG emissions. I believe it would be useful for the review to have information on the various energy sources of the Thermal Energy Systems and their GHG emissions per KWh and energy source produced so that their emissions can be easily compared to that of natural gas and electric energy in BC which are both considered clean in BC. Further, as these TES system become more monopolistic in nature, we should to the protection of the TES ratepayer by stream.

Regards,
Donald Flintoff
