Subject: Comment on BC Hydro's Application to Amend Net Metering Service

Caution: This email is from an external sender, please use caution before opening attachments or links. If you do not recognize the sender, please report this email to IT.

Dear Commission Secretary,

I am writing to express my support for Net Metering and my opposition to BC Hydro's application to Amend Net Metering Service (Project No. 1599004).

Over the past 15 years, thanks to Net Metering rates and engaged citizens working to shape the energy grid of the future, communities and individuals have invested their time and savings to create local solar installations across B.C.

Net Metering enables new sources of clean power, creates jobs, adds resiliency to our grid and proves that distributed power generation can work.

Our Net Metering community is growing and organized. We will not stand by and allow BC Hydro to roll back our potential to grow and share clean solar power. As a regulator mandated to protect the public interest, please reject the punitive sizing restrictions and rate reductions proposed by BC Hydro's amendment application, and ensure that the broader community is consulted about the future of our shared clean energy grid.

Sincerely,

Florence Erwin
