**Comment:**

National Geographic once reported that Kalamalka Lake was one of the 10 most beautiful lakes in the world. I grew up in Vernon BC and spent most summers at my best friend's family's place in Cosens Bay. Without power, there aren't a lot of running toilets. There are outhouses and many generators. Some have brought in solar panels, but they still have their pollution effect in the mining and manufacturing of the panels. We need to protect our beautiful lake and this clean fresh drinking water not only for the residents of Cosens Bay, but for Vernon and Kelowna and the south Okanagan. This lake feeds the creeks in Vernon and ultimately goes into Okanagan Lake. I own a property in Cosens Bay, and until power is secured, I have avoided building a house. I for one, am trying to do my part in protecting our planet. With power I will be able to install working toilets and avoid gas powered generators. Please support this project and provide us more opportunity to do our part to protect our beautiful lake.
