Comment:

As a Cosens Bay property owner for the past 20 years, not having power has been costly, unsafe and is a risk to the environment. Running solar panels with back-up generators as the community grows, is not acceptable in this day and age. The pollution from generators (both noise and fossil fuel) is unacceptable. The last thing neighbours want to listen to is generators being run to charge solar systems. It is my opinion that Cosens Bay community should receive the same benefits as the rest of BC residents, and have power to their homes. This is a growing community and the demand for power will only increase. We look forward to the day when we can flip a switch to turn lights on.
