Comment:

I am writing in support of the Cosens Bay Power application. We have been proud owners of our current property located on Cosens Bay Road in the Coldstream area along Kalamalka Lake since 1989, and before that owned a different lot from 1974-1977. We have been denied our right as taxpayers in a semi-rural community to be granted power, a common service that is readily available to millions of British Columbians. There has been new developments and as such our community base has grown considerably over the years. In the face of these developments I feel we are justified in our request and that the provincial government would be in support of our request to obtain power to our home. Our air would be cleaner, our forests safer as we would not have to burn wood to heat our homes, and therefore provide better stewardship of our lands, forests and water resources. There has been much demand for a cleaner BC climate strategy throughout our province and our country, and approving our power application, something we and most Canadians expect and deserve, will be supporting this initiative and our family's desire to enjoy what should be available to us already. Many thanks.
