Comment:

We are owners of property on Kalamalka Lake and have been coming to Kalamalka lake since the 50's. We started with Coleman lights and stoves, then moved to propane lights and appliances, and most recently to minimal solar power for lights while still having propane appliances. A generator is required for certain high energy requirements, and as we age ,plus our families get larger, the demands for a clean safe source of electricity is an optimal option for our community. The burning of fuel and propane does support our environment values. We therefore strongly support this application.
