Comment:

My wife and I have owned property at [REDACTED] since 1973. My family has owned property on Cosens Bay Road since 1957. For many years we have dreamed of having some services in our area and receive some value for the taxes we pay annually. We currently have no sewer, water, power or garbage service in our community. We have used solar power for many years but it does not provide an effective solution year round due to geographic location and other weather related factors. Being that we are now both in our 70's, the introduction of power into our community would make our retirement years much easier and provide our future generations with a more manageable property. Our community has been actively seeking power for more than 10 years and we believe we have a real solution which will provide power to the area. We are shareholders in Cosens Bay Power Ltd and actively support the project and support the application with BCUC.
