Comment:

We are a property owner in the cosens bay area and are 100% behind the installation of power in the community. It is basic need for us as we cannot rely on solar power & back generator. My wife has been on kidney dialysis and the battery storage of power does not work well for the machine. We have already burnt out one machine. We have neighbour's so are not able to run the generator through the night. My brother also has sleep apnea and we don't have enough power to run his machine. Power would allow use to enjoy our property not only in the summer but winter as well.
