Comment:

Hello, This is my second letter. I am humbled by the fact I forgot to include the environmental factors of this project in my first letter. Having hydro at the lake would eliminate noise pollution, as well as air pollution. Currently, we use a generator to meet our energy needs, which results in unnecessary noise (when we are up there for the peace and quiet nature provides) and air pollution. It would be so nice if we could continue to listen to nature's sounds, as well as breath fresh air, when a family member needs to shower or turn on a light. Thank you for considering my thoughts on this aspect of the project, Elaine
