**Comment:**

We worked hard and saved to purchase our property 41 years ago, we were young with a young family. We are now over 70 and would like to spend our summers there with our grandchildren. To have reliable power would enable us to do this. It would give us the option for electric fridges, heat, and also run medical devices such as cpack machines. This would enable us to lessen the use of fossil fuels used in propane fridges, heaters, and generators. We ask that the power company be permitted to get on with the project to get us power. Please let this happen.
