**Comment:**

Our lot on Kalamalka Lake has been in my family since 1958. Over the years, as we progressed from tenting ,to a small trailer , and finally to a cottage, my husband has designed and installed many of the systems we use , which are powered by generator, propane, solar panels & batteries/rv pumps . I have the concern that , should he predecease me, I would have great difficulty troubleshooting these various systems.....life would be so much simpler if we had a clean source of electricity and could standardize everything . We support the CB Powerline project under review 100 %. It offers so many environmental benefits, would lead to a safer community, and , because it is user funded, does not financially burden the taxpayers of the surrounding area. We hope you will approve it !
