Subject: BC Hydro Application - Private Outdoor Lighting Services

[redacted] – Duncan BC

I am writing on behalf of the Maple Bay Yacht Club regarding the application made by BC Hydro to the BC Utilities Commission to terminate service under their Private Outdoor Lighting rate for BC Hydro owned and maintained outdoor lights illuminating private property after September 2022.

Our light is attached to a BC Hydro pole and therefore, we would opt for the option to have the light replaced with a new LED fixture, and the service continued under the Overhead Street Lighting Rate. We continue to require adequate lighting for the safety of those individuals while on our property. Therefore, would not want the costs to replace the pole and lighting at our own expense when it may be covered under BC Hydro established rate.

We look forward to hearing the outcome of this application made by BC Hydro following the decision of the BC Utilities Commission.

Respectfully
[redacted]
Club Manager
