Greetings,

I am a person on disability but would gladly pay taxes on my allowance if it were to aide in the termination of Site C Dam. This damn is useless, we have all the alternative power technology (including tidal power and biodiesel) at our fingertips that would not harm the environment like a damn would. We could be selling our excess alternative energies to the States or other Provinces. Site C is destructive and icings not only on valuable agricultural land, but sacred indigenous sites. I am First Nations and strongly object to ceremonial and sacred sites being destroyed. We don't need destruction, we need lasting jobs and creation in the alternative.

Thank you.

Wendy Jones
