To: BCUC Commission Secretary and Chair,

I am a third generation land owner in the Bear Flat / Cache Creek area and my husband and I had several parts of our land taken by full expropriation by B.C. Hydro for the Site C project.

This project should be terminated immediately.

We will repurchase every part of our land back from B. C. Hydro. That is money back to the ratepayer.

The agriculture land expropriated for the Highway realignment will be put immediately back to agriculture use. I need for these lands to be returned to us in a very short time line and not held for years. The Statutory Rights of Way have to be removed from the lands that they were put on.

I was a first hand observer of B.C. Hydro's work at Bear Flat / Cache Creek area over the past year and their abilities get a failing grade. They messed up everything possible and could not get any aspect done correctly. As everyone knows, mistakes cost money and their performance was pathetic. I will expand on this if the BCUC wants to take the time.

I also do not want higher B.C. Hydro bills as my bills seem extreme for what little power we use.

Thank you for allowing my input.

Clara London
