---

If People that are old enough to remember, seems that WAC Benett got all kinds of flack for building the WAC Benett Dam . We were NEVER going to use all of the electricity it would produce? What happened?

Besides how are all of the trucks,trains,commuter vehicles and personal cars going to recharge their batteries

If there is no electricity to charge them with as well as all the overhead power sources for trucks ,bus.es and

Trains.

Stopping Site C to my way of thinking is not in the best interest of all of us here in our province of British Columbia.

Robert Holm.
