Subject: Site C Dam

Hello,

I am a taxpaying citizen who has lived in BC for more than 4 decades and I would like to see alternatives examined and implemented regarding the site C Dam, to which I am opposed. The idea of flooding the valley and not only displacing people but wiping out a natural place of beauty (tourist dollars as well...) is, in my opinion, counterproductive to the way I believe, we need to go as a nation and globally.

The stats on alternative energy success are rising, and many people are getting on board. Let's be responsible and put research money into that.

Site C Dam must not happen.

with all best regards,
Carolyn Bell
