What troubles me most is that from the overwhelming evidence of BCH getting so many things wrong for such a long period, there are no consequences. It is like BCH could not manage to escape from the first step of the learning curve despite having 15 years to do it. I wrote before and I still say that no one could actually be so financially and economically illiterate, for so long and with so much of someone else's money, unless it was deliberate.

That is what happened in Ontario and only now are folks having to show up in court to answer charges of document destruction etc.

I am nearly certain we have similar laws IN BC but it remains to be seen if they will be invoked to get accountability.

No one is yet to talk about the AG's report on the BC "contingencies and contractual obligations" report of last Feb. BC HOLDS THE CANADIAN RECORD FOR THE PROVINCE WITH THE GREATEST AMOUNT OF CONTRACTUAL LIABILITIES PER CAPITA ,AT A STAGGERING \$22,400; TWICE OUR NEAREST COMPETITOR, QUEBEC , AND NEARLY SIX TIMES THE PER CAPITA AMOUNT FOR PEOPLE OF ONTARIO. OF THE BC TOTAL OF \$102, MORE THAN HALF IS FROM BC HYDRO.

WE ARE WAY PAST THE "FOOL ME ONCE; SHAME ON YOU; FOOL ME MORE, THEN SHAME ON US"
