First Name: Harvey  
Last Name: DesRoches

Organization: Very concerned citizen

Comment: I strongly appose the construction of Site C dam for a number of reason;

- 1) I don't think it's necessary or appropriate to build such large and environmentally damaging infracture
- 2) I'm very concerned we'll loss the sovereignty of our public utility of BC Hydro through excessive debt resulting in significant rate increases
- 3) I think there are other more appropriate means of producing electricity that are more environmentally friendly such as geothermal, wind, tide, and solar.
- 4) In the long term I think the farm land, recreational, and wildlife uses that excede the valu of the flooded valley.
