Dear British Columbia Utilities Commission,

I am writing to urge you to recommend that the Site C Dam be rejected.

This project was created primarily to provide power for BC's misguided promotion and support of the LNG industry which used hazardous "fracking" techniques for its extraction. This gross misuse of our land and natural resources is likely to cause irreparable damage to the natural environment and should not have been allowed to proceed in the first place.

Further development of this project would not only be prohibitively expensive, but would also run counter to the government's stated aim of seeking consultation and reconciliation with our Indigenous peoples, who on balance, are opposed to this use of their traditional lands. It will eliminate their ability to continue their traditional way of life, and severely curtail their treaty-protected constitutional rights to hunt, fish, trap and harvest.

The Site C Dam is clearly not in the public interest. Please recommend to the BC Government that this project be canceled.

Thank you for your consideration.

Sincerely,
Len Digance
