Subject: Submission on Site C Dam
Date: Monday, September 25, 2017 2:58:57 PM

Dear British Columbia Utilities Commission,

I am writing to encourage you to recommend rejection of the Site C Dam.

The energy projections BC Hydro provided are based on LNG growth that has not happened, and that is not likely to happen based on current market conditions. Renewable energy (wind, solar, geothermal, etc.) is decreasing in cost, and will certainly command the market during the projected lifespan of Site C (likely very early on in its lifespan). The negative impacts of Site C far outweigh its benefits, when considering the alternatives that are currently available and will continue to become more available. These negative impacts include a host of environmental effects, including negatively impacting BC's food security -- and, perhaps most importantly, the project infringes on our Indigenous peoples' sovereignty.

The Site C Dam is clearly not in the public interest.

Please recommend to our provincial government that this project be canceled.

Thank you in advance for your consideration.

Sincerely,
Erin Gray
