I had planned to attend the hearing this evening in Kamloops, but have just found out that I had to preregister by yesterday just to listen to the hearing, and I've learned that **there is no more room for any other members of the public to attend**. It is very disappointing to learn this now; I am frustrated and disappointed that this information about pre-registration was not publicly communicated.

As a lifetime resident of British Columbia, I would like to voice my strong opposition to the Site C dam project.

My opposition to the Site C dam is based on my concern that this project is not needed in British Columbia. It makes no sense to completely damage a thriving, irreplaceable valley and all the wildlife in it, to create power that we do not need!

Now is not the time to spend huge amounts of money on a project that is not necessary and that doesn't use our best technology to create energy for BC. We need to put investment into sustainable, renewable sources of energy NOW!

Spending billions of dollars on a project that will increase Hydro costs for every citizen for decades, while offering nothing but destruction to the Peace River Valley, is wrong.

The mere fact that the dam's original plans include removing nesting eagles from the valley and transporting fish **for 100 years** from the bottom of the dam to the top, demonstrates that this project is poorly conceived. Site C is totally unrealistic and irresponsible!

Please listen to the citizens of British Columbia who recognize the futility of continuing with this unnecessary project. Stop Site C NOW!
