To whom it may concern

I am writing this letter in support of the site c dam. I have 4 main reasons.

1. The increase in electric vehicles projected over the next 10 years is very dramatic and therefore power consumption will continue to rise.
2. Air pollution in many parts of the world is a huge problem – clean air and water is a huge advantage for BC on a world scale.
3. Money has been spent already so stopping it would waste that money.
4. Flooding the peace valley will not ruin an ecosystem it will change it, where deer once roamed now fish will swim.

In summary I think we need to as a province be investing in the future of clean power. I cannot support coal or nuclear power generation over Dams.

We owe it to future British Columbians to do our part to make this world a cleaner place.

Thank you

Nick Westeringh
