BCUC INQUIRY RESPECTING SITE C

F 191-1

Date: September 27, 2017

Subject: Submission on Site C Dam

Dear British Columbia Utilities Commission,

Regarding the Site C dam, I urge you to carefully consider the impact any decisions or actions regarding this issue will have.

This dam will be obsolete before it's finished and there is no hope of ever recouping the money that it will cost to build and operate.

Even as I am writing this there are wind farms being built that make much more financial and environmental sense .

Thank you for your consideration.

Sincerely,

Fritz Rotmeyer
