BCUC INQUIRY RESPECTING SITE C

F 193-1

Date: September 27, 2017

Subject: Site C and fossil fuels

Dear British Columbia Utilities Commission,

How much electricity does BC need if we are to transition from fossil fuels?

My calculations suggest we will need thousands of hectares of solar and dozens of site c scale hydro projects.

Do any of the critics of this project know the scale of our electric future or the costs?

Sincerely,

Dean Sinnett
