

Name: River Glen

BCUC INQUIRY RESPECTING SITE C

F 219-1

Date: October 02, 2017

Please stop the Site C dam project. I believe it is going to destroying irreplaceable farmland and wilderness. It locks future generations into current technology, it lays a heavy financial burden on the rate and tax payers. Mega anything exceeds the mandate of any government. The First Nations that oppose the dam do not deserve more losses. The nations that signed did so because they feel their people can only get their needs met with this. There needs should have been set before this and in other ways. No I do not give my consent to their dam never did and never will.
