BCUC INQUIRY RESPECTING SITE C

F 225-1

Date: October 04, 2017

Subject: Site C inquiry

I ask that Site C not be built.

Site C is not what British Columbians need.

The risks and losses outweigh the benefits.

Many farms that sustain food for communities would be lost... forests would be lost...the environment people depend on for their sustenance would be flooded.

The costs are astronomical and more economical, less harmful alternatives exist.

There are other ways to generate power.

I just returned from a trip to Europe where I saw wind farms. Where are the wind farms in British Columbia?

I have reduced my need for power by 20% by changing my lightbulbs and running some solar panels in 'rainy Vancouver'.

Don't use my tax dollars to flood a valley so that industrial projects like the tar sands can continue.

Thank you

Andrea Godding
