Subject: Input re Site D dam

Dear Panel Members,

I attended the public input session on Site C dam that was held in Kelowna on September 25, 2017, though I did not address the panel. However, I am writing to voice my opinion on whether this project should continue, be put on hold, or stopped altogether.

I believe Site C dam should definitely not proceed. The project is estimated to run significantly over its original budget of billions of dollars, which will ultimately become a horrific long-term financial burden on consumers who are already struggling to survive in this difficult economy. Site C dam also represents the devastation of vast agricultural property as well as traditional indigenous land.

Thank you for your consideration.

Sincerely,
Catherine Cunningham-Huston
