This is all very good information, and I'm glad a thorough review is being done. Whatever the decision is, I think it would be important to try to summarize the key points that the decision was made on in a very very simple way. People want to know the reasons, but nobody will read 3000 pages of technical reports and detail. If it could be summarized and communicated in 2-3 pages or even less, that would be valuable in removing some of the mis information that is so prevalent. Or even printed in a one page newspaper ad.
