BC Utilities Commission

Hello

Thank you for opportunity to respond to preliminary report .

While there are umteen ifs and possible cenerio's that could go wrong I believe BC Hydro engineers have analyzed the complete situation for decades with a beneficial outcome .

Please bear in mind in the long term the benefit to the province amounts to some \$500,000,000 a year of clean renewable energy for the next 100 years. A nice legacy to pass on to future generation
