Attention: The Secretary

Dear Members of the Commission, Re Site C Inquiry

I would like to comment on the composition of the Alternative Portfolio used by B C Hydro in their submission. This portfolio is made up of projects that will deliver the same amount of energy and capacity as Site C.

This portfolio is based on a selection options that are presumably deemed to be viable options. B C Hydro did not give any weight to storage hydro potential in the province although their own studies of the Iskut Canyon and More Creek estimate the combined projects can produce up to 980 MW, the More Creek project alone can produce up to 170 MW.

I think any conclusion based on the BC Hydro portfolio which does not include storage hydro will be flawed and could result in a very expensive and misguided decision.

Regards

Cliff Grandison

President.
